

Invitation to 2026 New Year Gathering

Everyone has the right to be protected by the law.

The realities of war, persecution, discrimination, poverty, and the threat to freedom of expression are by no means events in a distant world. We are facing expanding challenges that each one of us must confront. Precisely because of times like these, the significance of our movement is growing ever larger. Amnesty's activities are built upon the solid conviction that, **"Even if an individual voice is small, by connecting, we can move society."**

We warmly welcome all members and Human Rights Supporters, as well as those interested in Amnesty International, and anyone thinking of starting some action.
